Digital Books as Open Educational Resources:

Bringing Open Source Educational Content to the Classroom

Students

NCES Digest of Education Statistics 2013

yearly books-and-supplies estimate

\$1,200

collegeboard.org

Money

Information wants to be free.

Information also wants to be expensive.

That tension will not go away.

Stewart Brand, 1987

Knowledge

90%

of worldwide available data has been generated over **the last two years.**

SINTEF (2013)

Pricey print media is becoming
outdated quicker yet we need to
give **more people access**

OER

- **public domain or open license**
- **free use**
- **re-purposing**

Creation

Educational content is created by **teachers**, **students**, even **algorithms**.

And they probably want to **get paid**.

Curation

Educational content needs **quality assurance** and must in many cases comply to **public regulations**.

Licenses

Creative Commons

GNU General Public License

Distribution

Educational content must be **maintained** and **distributed** to a variety of devices. That may include **commercial services**.
